EDUCATION

National Taiwan University — Taipei, Taiwan
Doctoral studies in Psychology (degree not completed) — *2022.09–2023.09*
- GPA: 4.26/4.30

National Taiwan University — Taipei, Taiwan
M.Sc. in Psychology — *2017.09–2021.06*
Advisor: Prof. Keng-Ling Lay
- GPA: 3.84/4.30
- Master's thesis grade: A+
- Additional program: Big Data and Digital Assessment Program

Sun Yat-sen University — Guangzhou, China
B.A. in Anthropology — *2013.08–2017.06*
- Major GPA: 3.90/4.00

MANUSCRIPTS & THESIS

[A1] **Li, Y.** (2026). *Beyond the one-parent model: Developing a shared-caregiving digital single-session intervention for school refusal in China* [Manuscript in preparation].

[A2] **Li, Y.**, & Tan, R. (2026). *Do parental cognitions affect children's mental health? An empirical study in central China based on theories of intergenerational transmission and social learning* [Manuscript submitted for publication]. Under review at *Journal of Child and Family Studies*.

[A3] **Li, Y.** (2021). *The intervention effect of the self-concept curriculum designed by Taiwan Happiness Village Association on children with diverse initial states* [Master's thesis, National Taiwan University]. NTU Theses and Dissertations Repository. https://doi.org/10.6342/NTU202104178

CONFERENCE PRESENTATIONS & SUBMISSIONS

[A4] **Li, Y.** (2026, October 31–November 2). *Beyond the one-parent model: Developing a shared-caregiving digital single-session intervention for school refusal in China* [Poster presentation]. Forum on Adolescent Mental Health and Positive Development, Jinan, China.

[A5] **Li, Y.** (2026). *Through the lens and around the shared table: Noticing and food sharing as candidate mood-regulation resources across 12,799 diary days of emerging adults under prolonged COVID-19 campus lockdown* [Abstract submitted for poster presentation]. Submitted to the Global Stress & Resilience Meeting (2027 GSRNet Meeting), Lausanne, Switzerland (February 3–5, 2027); decision pending.

[A6] **Li, Y.**, Lay, K.-L., Lin, C.-Y., Chang, T.-C., Yang, L.-J., Chen, H.-T., & Wang, Y.-J. (2019, August 29–31). *Differential SEL effect for children with diverse initial states: I. The self-concept curriculum designed by Taiwan Happiness Village Association* [Poster presentation]. 7th European Network for Social and Emotional Competence (ENSEC) Conference, Budapest, Hungary.

[A7] Lin, C.-Y., Lay, K.-L., **Li, Y.**, Yang, L.-J., & Chen, H.-T. (2019, August 29–31). *When an SEL program is implemented without community partnership: Differential SEL effect for children with diverse socioeconomic status* [Poster presentation]. 7th ENSEC Conference, Budapest, Hungary.

[A8] Cheng, C., Lay, K.-L., Lin, C.-Y., **Li, Y.**, Chang, T.-C., Yang, L.-J., Chen, H.-T., & Wang, Y.-J. (2019, August 29–31). *Differential SEL effect for children with diverse initial states II: The communication-skill curriculum designed by Taiwan Happiness Village Association* [Poster presentation]. 7th ENSEC Conference, Budapest, Hungary.

AWARDS & HONORS

- **2nd Prize** in Academic Paper Writing (National Round, Chinese Psychological Society) — *10/2026*
  Award-winning paper: *Beyond the Pressure–Accommodation Dichotomy: A Caregiver-Focused Digital Single-Session Intervention for School Refusal*
- Conference Travel Support, Forum on Adolescent Mental Health and Positive Development, RMB 1,000 — *10/2026*
- Recognition for Expert Contributions, Tsinghua University HCI Lab (AICo) — *09/2025*
- **1st Prize Scholarship**, "Go to the Field" Digital Field Research Camp, RMB 1,000 — *08/2025*
- Taipei Guangdong Association Scholarship, NT$10,000 — *2023*
- Provincial **1st Prize** in Group Counseling, Guangdong, RMB 2,700 — *2022*
- Outstanding Student Organization Award (University-level; Faculty Advisor) — *2022*
- Outstanding Contributor to Mental Health Education, Liaoning Province — *2022*

- Outstanding Volunteer Award, Xingang Social Work Station *12/2015*
- "Health Star" Honor, Sun Yat-sen University *2013*

RESEARCH EXPERIENCE

Note. [R1] = research experience; [A1] = academic output.

[R1] Beyond the Pressure–Accommodation Dichotomy and the One-Parent Model: *06/2026–Present*
A Culturally Adapted Digital Single-Session Intervention for School Refusal in China Leuven, Belgium
Independent Researcher

- Reviewed 61 studies on school refusal, family accommodation, and parent-focused interventions; identified no published caregiver-focused single-session intervention for school refusal.
- Culturally adapted Project EMPOWER for Chinese caregivers: drawing on local studies and clinical work, framed pressure (lacking acceptance of distress) and over-accommodation (lacking confidence in coping) as invalidation (Linehan).
- Developed *Morning Light*, a 25–30-minute mobile prototype sequencing distress tolerance, validating responses, and graded return steps, with safety triage and a 3-minute pathway inviting a second caregiver **[A1]**.
- Designed a phased evaluation, from parent co-design to a pilot randomized controlled trial that also randomizes the second-caregiver pathway.
- Won **2nd Prize** (top 10%) in a national paper competition (Chinese Psychological Society); poster presented at the Forum on Adolescent Mental Health and Positive Development 2026, with RMB 1,000 travel support **[A1, A4]**.

[R2] Social and Academic Self-Concept Profiles in Preadolescence: *06/2026–Present*
Cross-Sample Stability and Prospective Within-Child Links Across Domains Leuven, Belgium
Independent Researcher

- Reanalyzed 4-wave Master's thesis data from preadolescents in Taiwan (Grades 5–6; N = 1,016) in Mplus and sourced the U.S. Early Childhood Longitudinal Study (Grades 3 and 5; N = 14,392 and 11,282) to test replication.
- Largely replicated five self-concept profiles across samples using latent profile and transition analyses (LPA/LTA); social-leading profiles were far more stable than academic-leading ones (U.S.: 82% vs. 34%).
- Estimated random-intercept cross-lagged panel models (RI-CLPM) adjusting for global self-worth, finding that feeling more accepted by peers than usual predicted higher academic, athletic, appearance, and conduct self-perceptions at the next wave, mainly before and across the program (βs = .18–.29).

[R3] Active Ingredients of Self-Recording: Daily Mood in a Lockdown Photo-Diary Intervention *03/2026–Present*
Independent Researcher Leuven, Belgium

- Reanalyzed daily diaries from emerging-adult accounts (N = 681; 12,799 entries over 28 days) from *21-Day Photo Diary*, a self-designed, single-arm intervention during a COVID-19 campus lockdown.
- Matched pre–post assessment data (n = 442) and found lower stress and slightly higher self-esteem at posttest.
- Developed a semantic coding system; completed two mood-blind coding passes, resolved 94 coding disagreements, audited 300 unmatched captions, and finalized codes before linking them to mood ratings.
- Within-person analyses of intensive longitudinal diary data in Python linked nature or pet mentions to higher mood and COVID-19 testing, lockdown, or online-class mentions to lower mood. Mood was highest on food-sharing days, followed by days featuring food and people, then either alone.
- Authored and submitted an abstract to the 2027 GSRNet Meeting in Lausanne, Switzerland; decision pending **[A5]**.

[R4] Adolescent School Refusal in China: From Family Interviews to Policy *11/2025–12/2025*
Interviewer Online
National Mental Health Assessment and Development Center, Institute of Psychology, Chinese Academy of Sciences

- Interviewed a family facing school refusal; produced verbatim transcripts and a reflexive interview log.
- Authored a policy brief proposing 10 school- and community-level measures, including tiered response and referral, graded return-to-school steps, and cross-agency case management, each with evaluation indicators.

[R5] Eating for Whom? Food Posts and Identity Construction Among Chinese Young Adults *07/2025–08/2025*
Trainee Researcher & Group Presenter Online
Digital Fieldwork Summer Training Camp, Shanghai Normal University

- Reviewed the literature, conducted and thematically analyzed 14 photo-elicitation interviews, and piloted a pre–post self-esteem measure to explore their potential as a narrative intervention.
- Found that participants posted meals to deepen bonds with friends and family.
- Identified a fear of appearing boastful that prompted self-deprecating captions and deleted posts.
- Won an individual **1st Prize Scholarship** for research, teamwork, and presenting a 64-interview study.

[R6] Adapting the Trauma Recovery and Empowerment Model (TREM): *11/2022–10/2023*
A Group Intervention for Incarcerated Women with Substance Use and Trauma Histories Taipei, Taiwan
Research Assistant & Group Recorder
Intervention: Trauma Recovery and Empowerment Model (TREM)
PI: Prof. Hui-Ching Wu, Department of Social Work, National Taiwan University
Funding: National Science and Technology Council, Taiwan (110-2410-H-002-135-SS2)

- Independently facilitated one TREM group session at Taoyuan Women's Prison.
- Co-screened participants using a pre-group trauma measure and rehearsed and discussed session plans for the localized 12-session TREM intervention with the principal investigator.
- Documented and analyzed 15 group sessions using structured records of near-verbatim dialogue, nonverbal cues, Yalom's therapeutic factors, group-stage dynamics, and member-level ratings.
- Collected and checked pre–post questionnaires from 19 women across two prison cohorts and interviewed 5 participants for a longitudinal TREM evaluation (N = 59; follow-up to 10 months).

[R7] Development of Emotional Intelligence During Preadolescence *08/2018–06/2021*
and the Effects of a School-Based Social-Emotional Learning Program Taipei, Taiwan
Research Assistant & Project Coordinator
Supervisor: Prof. Keng-Ling Lay, Department of Psychology, National Taiwan University
Funding: Ministry of Science and Technology, Taiwan (106-2410-H-002-078-SSS; 107-2410-H-002-121-SSS)

- Managed six-wave Taiwan data (1,700+ participants) and two-wave Beijing data (2,300+ participants); recruited and supervised undergraduate assistants for data entry and led data cleaning and archiving.
- Used Mplus and R to analyze six-wave, two-year longitudinal data from Taiwanese preadolescents using EFA, CFA, latent growth curve (LGC) models, and multi-group autoregressive latent trajectory (ALT) models.
- Revealed divergent self-concept trajectories: continued gains among children with higher initial scores and buffered declines among those with lower scores, with effects maintained at the 8.4-month follow-up.
- Analyzed child- and parent-reported emotional intelligence among Beijing students in Grades 4, 5, and 7 using paired t-tests, ANOVA, and ANCOVA in SPSS and SAS to examine pre–post changes and intervention–control group differences.
- Co-developed with Prof. Lay a coding system to assess children's problem-solving skills from written responses; recruited and trained 5 undergraduate coders and assessed inter-rater reliability using Cohen's kappa.
- Completed a master's thesis (grade: A+) and presented first-author findings at the 7th ENSEC Conference in Budapest **[A3, A6]**; co-authored 2 additional posters **[A7,A8]**

[R8] Maternal Beliefs, Achievement Goals, and Preschoolers' Motivation and Task Performance *02/2018–06/2018*
Research Trainee, Graduate Seminar on Scientific Writing (Spring 2018) Taipei, Taiwan
Research Supervisor: Prof. Keng-Ling Lay **Writing Instructor:** Prof. Chao Ying Joanne Peng

- Reviewed literature on implicit theories and achievement goals to contextualize the research team's hypotheses.
- Used SPSS and R for Cronbach's α, correlation, regression, and moderation analyses (77 mother–child dyads).
- Drafted a research manuscript in English, integrating the literature review, methods, and preliminary findings under the course instructor's guidance.

[R9] Visitor Expectations and Experiences in a Safari Park: A Mixed-Methods Study *02/2017–05/2017*
Undergraduate Thesis Researcher, Sun Yat-sen University Guangzhou, China
Supervisor: Prof. Peng Zhang

- Adapted a structured observation protocol and operationalized behavioral coding categories for 507 visitor groups across 6 exhibits, recording viewing duration, visitor behaviors, animal activity, exhibit conditions, and visitor density.
- Integrated pre-visit preference data from 44 visitors, interviews, and 600 on-site verbal records with behavioral observations to examine viewing preferences and visitors' understanding of animals.
- Used SPSS to dummy-code categorical predictors, log-transform viewing duration, and conduct hierarchical regression, chi-square tests, and Mann–Whitney U tests.
- Interviews revealed how familiar stories such as *King Kong* and zodiac associations shaped visitors' expectations of animals.
- Found that animal activity, behavioral demonstrations, and visitor engagement were associated with longer viewing times; the final model explained 42.8% of variance in log-transformed viewing duration.

[R10] Education and Adolescent Development in Rural Yao Communities *07/2015–08/2015*
Field Research Intern, Sun Yat-sen University Guangxi, China
Supervisor: Prof. Tongxue Tan

- Conducted ethnographic fieldwork using participant observation, interviews, case studies, and psychological measures.
- Authored an ethnographic report on rural adolescents and left-behind children in Gongcheng; grade: 92/100, Excellent.

CLINICAL EXPERIENCE

Clinical Hours: 1,070+ hours of individual counseling; 80+ hours of crisis hotline support; 250+ hours of supervision received.

Individual and Group Counselor *10/2025–Present*
Chinese Students and Scholars Association of Leuven Leuven, Belgium

- Provided low-fee, long-term individual counseling to Chinese international students (80+ hours to date).
- Designed and led *Rooted & Blooming*, two single-session group interventions for graduate students ($N = 24$) on stress, sleep, and perfectionism, using mindfulness, cognitive behavioral therapy for insomnia, and Internal Family Systems (satisfaction: 9.67/10).

Clinical Counseling Expert *05/2025–09/2025*
Pervasive Computing and Human–Computer Interaction Lab, Tsinghua University Online
AI-Assisted Online Counseling Project

- Built 3 literature- and practice-informed decision trees (15 problem domains; 200+ action steps) guiding an AI counselor through acculturative stress, anxiety, and low belonging among Chinese students and professionals abroad.
- Monitored real-time AI-delivered counseling with clients (1 AI to 3 clients), correcting or taking over when responses were clinically inappropriate.

Psychological Counselor, Independent Practice *11/2024–Present*
Glowe and Psybyond, Online Counseling Platforms in China Online

- Provided 400+ hours of online individual counseling to adolescents, adults, and parents.
- Addressed obsessive-compulsive and illness anxiety presentations, gender identity, and school refusal.
- Received 120+ hours of ongoing clinical supervision and case consultation.
- Completed training in structured intake, suicide risk assessment (Columbia Suicide Severity Rating Scale), risk reporting, referral, and termination.

Trainee Psychotherapist *03/2024–04/2024*
The Affiliated Brain Hospital of Guangzhou Medical University Guangzhou, China

- Provided 37 hours of individual psychotherapy in outpatient and inpatient psychosomatic medicine units.
- Shadowed 2 psychiatrists across 600+ outpatient consultations and 10 days of inpatient ward rounds (50+ bedside visits).

Mental Health Hotline Counselor (Volunteer) *10/2023–03/2024*
Well-being Public Service Hotline, Tsinghua University Remote

- Completed 10 training modules on crisis intervention and suicide risk assessment, ethics, hotline procedures and difficult calls, recognition of mental disorders, narrative approaches to caller strengths, and counselor self-care.
- Provided 80+ hours of telephone-based emotional support and crisis intervention.

Mental Health Counselor (Full-Time) *09/2021–08/2022*
Mental Health Education and Counseling Center, Guangzhou College of Commerce Guangzhou, China

- Designed and delivered two digital emotion-regulation interventions during COVID-19 campus lockdowns, *21-Day Photo Diary* (800+ faculty and students) and *Mindfulness Journey* (1,001 participants), with pre–post assessments.
- Designed and led student groups, including a single-session intervention that won a Guangdong provincial **1st Prize**.
- Provided 557 hours of individual counseling to 77 clients, including part-time online work (10/2020–11/2024); received 130+ hours of supervision.
- Conducted 23 hours of psychological assessment and provided crisis intervention for 20+ high-risk cases.
- Co-led a postvention support group for about 10 staff who handled the on-site response to a student suicide.

PROFESSIONAL REGISTRATION & CREDENTIALS

- **Registered Psychologist (Clinical Psychology)** *2024–2026*
  Chinese Psychological Society
- **Psychotherapist (Junior Level)** *2023*
  Ministry of Human Resources and Social Security and National Health Commission
- **Assistant Social Worker (Junior Level)** *2022*
  Ministry of Human Resources and Social Security and Ministry of Civil Affairs

TEACHING EXPERIENCE

Guest Lecturer *05/2023*
Department of Clinical Psychology, Fu Jen Catholic University New Taipei City, Taiwan

- Delivered an invited lecture on qualitative and mixed methods research to about 50 clinical psychology undergraduates.
- Covered phenomenology, ethnography, case studies, grounded theory, and concurrent and sequential mixed-methods designs.

- Taught qualitative rigor (reflexivity, triangulation, interpretive and theoretical validity, and transferability); developed practice questions and assessment materials.

Psychology Lecturer *09/2021–08/2022*
Guangzhou College of Commerce Guangzhou, China
- Taught a two-semester mental health course to 816 undergraduates in nine sections across majors, covering mental health literacy, emotion regulation, stress management, and interpersonal skills.
- Co-developed the curriculum through team-based lesson planning, leading several units; designed self-reflection and drawing assignments and ran group psychodrama projects with instructor and peer assessment.
- Engaged students with multimedia and smartphone-based interaction, earning a teaching quality score of 95.27/100.
- Delivered a campus-wide lecture on mindfulness and emotion regulation to 400+ students.
- Trained 200+ peer helpers, including class mental health representatives, hotline responders, and letter-response volunteers, in child development, empathic communication, and solution-focused helping skills.

Undergraduate Research Mentor *09/2018–06/2019*
Introductory Independent Study, National Taiwan University Taipei, Taiwan
- Mentored 4 undergraduates over 2 semesters in the social-emotional learning longitudinal project, guiding literature review, data entry and management, and coding of children's problem-solving responses.
- Provided individualized written feedback on students' research performance.

Teaching Assistant *02/2018–01/2019*
Department of Psychology, National Taiwan University Taipei, Taiwan
Courses: *Psychology of Adolescence*; *Socioemotional Development*
- Guided 7 undergraduate students in a research project on career turning points in adulthood.
- Managed course logistics, including textbook orders and assignments, and answered students' questions.

SERVICE & OUTREACH

Campus Mental Health Outreach *09/2021–08/2022*
Mental Health Education and Counseling Center, Guangzhou College of Commerce Guangzhou, China
- Led digital mental health outreach on WeChat, curating 20+ articles (31,000+ views) and editing or writing several.
- Coordinated Mental Health Awareness Month across the university's 9 schools, supporting about 26 activities.
- Advised the student mental health organization, which received the university's Outstanding Student Organization Award.
- Developed and edited a mental health handbook distributed to all incoming first-year students.

GROUP INTERVENTION DESIGN

Caregivers of Adolescents with Depression *02/2023–06/2023*
Course Project in Social Group Work, National Taiwan University Taipei, Taiwan
- Authored the intervention protocol and a mixed-methods evaluation plan.
- Led the final session in a classroom simulation and developed a caregiver resource booklet.

Adults with Bipolar I Disorder *09/2022–01/2023*
Course Project in Psychiatric Social Work, National Taiwan University Taipei, Taiwan
- Authored a protocol combining cognitive behavioral therapy with interpersonal and social rhythm therapy.
- Developed a mixed-methods evaluation plan for mood symptoms and social functioning.

RELEVANT SKILLS

Research Methods: Intervention and program evaluation, longitudinal and pre–post designs.

Qualitative & Mixed Methods: Ethnographic and digital ethnographic fieldwork, participant observation, semi-structured and life-history interviews, photo-elicitation, qualitative case analysis, and mixed-method research.

Statistical Methods: Missing-data handling, reliability analysis, ANOVA/ANCOVA, multiple and hierarchical regression, moderation analysis, repeated-measures analysis, EFA, CFA, and SEM.

Longitudinal & Person-Centered Modeling: Latent growth curve modeling (LGCM), autoregressive latent trajectory (ALT) modeling, random-intercept cross-lagged panel modeling (RI-CLPM), multi-group ALT and RI-CLPM, latent profile analysis (LPA), latent transition analysis (LTA), BCH distal outcome analysis, and intensive longitudinal (daily-diary) modeling with fixed effects and within-/between-person decomposition.

Software: SPSS, Mplus, SAS, R, Python, LaTeX, E-Prime, and LISREL.

Languages: Mandarin Chinese, Cantonese, and Hakka (native); English (advanced proficiency).
